

The Armstrong CD-72S/SL is a disc style trap designed to control the trap's cycle rate. By reducing the cycle rate, the Armstrong CD-72S/SL will have a longer service life than typical disc traps. This enhanced performance will ensure that maintenance time is minimized and steam costs are greatly reduced.

The CD-72S/SL is designed with three discharge ports, which offer stable disc operation to extend trap operating life. The capacity of the Armstrong CD-72S/SL has been engineered specifically for the following applications: large steam main drips, process equipment, and HVAC heating equipment on constant pressure.

Advantages

- Three discharge port design
- Minimum wear with controlled cycling
- Freeze-resistant
- Hardened seat and disc
- Weldable

Series CD-72S/SL

List of Materials	
Name of Part	Material
	CD-72S/SL
Body	Dual certified ASTM
Cap	A105N / A350 LF2 Cl.1
Disc	ASTM A276 Gr. 420
Strainer Screen	30 x 30 Mesh T-304 Stainless Steel
Screen Retainer	A105N / LF2
Blowdown Plug	T316 stainless steel
